

# Krish Shah

Full Stack Developer • Product-Oriented Builder

Ahmedabad, India | [krish23076@gmail.com](mailto:krish23076@gmail.com) | [linkedin.com/in/krish-shah-7461b8325](https://linkedin.com/in/krish-shah-7461b8325) | [github.com/Krishshah23](https://github.com/Krishshah23) | [kreesh.me](https://kreesh.me)

## SUMMARY

Second-year BTech Computer Science student building polished, feature-rich web products across Flask, React, .NET, PHP, HTML, CSS, and JavaScript. Strong focus on product thinking, system design, UI polish, and real user workflows. Comfortable taking an idea from rough concept to deployed, usable product.

## SELECTED PROJECTS

### Criticalx Polls — Fantasy Cricket Prediction Platform

- Automated poll generation for IPL match schedules and player squads.
- Confidence-based scoring, reward boosts, live countdowns, leaderboards, and shareable results.
- Flask + SQLite app with admin tools, analytics dashboards, and a gamified prediction loop.

### BrainBrew — Gamified Learning Platform

- Multiplayer quiz battles with adaptive flashcards, repair mode, XP progression, and performance analytics.
- 260+ users joined within 48 hours and 1000+ quiz attempts were recorded.
- Built with Flask, SQLite, HTML, CSS, and JavaScript.

### SpiceGarden — Premium Restaurant Website

- Elegant restaurant brand site with menu, gallery, reservations, and polished visual presentation.
- Static frontend focused on responsive design, branding, and premium user experience.

### WanderLux — Luxury Travel Website

- Cinematic travel experience built with HTML, CSS, and JavaScript.
- Focus on immersive layouts, itinerary-style presentation, and premium frontend craft.

## SKILLS

|           |                                                                                          |
|-----------|------------------------------------------------------------------------------------------|
| Languages | Java, Python, JavaScript, SQL, PHP                                                       |
| Frontend  | HTML, CSS, React, responsive UI design                                                   |
| Backend   | Flask, Node.js, Express, Django, .NET                                                    |
| Databases | SQLite, MongoDB                                                                          |
| Tools     | Git, GitHub, Vercel, Render, PythonAnywhere, VS Code                                     |
| Concepts  | REST APIs, authentication, analytics dashboards, gamification, product design, ML basics |

## ADDITIONAL EXPERIENCE

- Built multiple full-stack PHP projects, Java console applications, and an attendance calculator currently being converted into a web app.

## EDUCATION

### BTech in Computer Science Engineering — 4th Semester

Ahmedabad, India
